

Software product lines, feature modelling, analysis and configuration

David Benavides
benavides@us.es

Evolución y Gestión de la Configuración

The main goal of this lesson is to give an overview of “software product lines” from a practical and research point of view

Part I

Software Product Lines

Variability Modelling

Some real cases

Real cases

Secure & easy online voting

Secure, robust and affordable internet election management solution that makes it easy for voters to cast their vote online

Real cases

The image shows the top section of the INPRO website. At the top left is the logo for the Diputación de Sevilla, which includes the text "DIPUTACION DE SEVILLA" and "INPRO". To the right of the logo is a search bar with the placeholder text "buscar..." and a magnifying glass icon. Further right is a lock icon followed by the text "Zona Empleados". Below these elements are links for "RSS | Directorio | Mapa Web | Contacta". The main header area features a network diagram background with the text "Sociedad de Informática Provincial" and "INPRO" in large letters. At the bottom of the header is a navigation menu with the following items: "Inicio", "La Empresa", "Noticias", "Novedades", "Nuestros Usuarios", "Productos y Servicios", and "I+D".

DIPUTACION DE SEVILLA INPRO

Real cases

**What configurations
should I test to defend
my users from bugs?**

Software product lines

Software product lines

Industrial Trends

Organizations
are evolving

- *Project* Centric Software Engineering
- *Product* Centric Software Engineering

Software
variability
constantly
increasing:

- Variability goes from hardware to software
- Variations points grows by thousands

Assets' *Reuse* is
shifting

- from ad-hoc to *systematic*

**What is a
software
product line?**

Real example

Real example

PAELLA VALENCIANA
arroz, pato, pollo, garofol, tortido y perdizo

PAELLA VALENCIENNE
à la poulet, haricots, fèves, tortisses et perdrix

VALENCIANISCHE PAELLA
Riz, Hühnerfleisch, Artischocken, Bohnen, Tortisens, Wildgans

PAELLA VALENCIANA
рис, куропатка, фасоль, бобы, цыганские и перепела

PAELLA VALENCIANA

ARROZ NEGRO
arroz, calamar, gambas, setas, pato o pollo, tomate, tinta de calamar y pimiento

RIZ NOIR
à la seiche, calamars, crevettes, champignons, tortisses, perdrix, sauce à la sauce

CHERNÝ RIZ
рис с кальмаром, креветками, грибами и соевым соусом, перепела, томатный соус

Чёрный рис
рис с кальмаром, креветками, грибами и соевым соусом, перепела, томатный соус

ARROZ NEGRO

PAELLA DE MARISCO
arroz, calamar, langostinos, setas, pato, gambas, setas, tortido, calderín y perdizo

PAELLA FRUITS DE MER
à la seiche, calamars, crevettes, champignons, tortisses, perdrix, sauce à la sauce

PAELLA MIT MEERESFRUCHTEN
Riz, Tintenfisch, Garnelen, Champignons, Tortisens, Wildgans, Sauce à la Sauce

Паштет морепродуктов
рис, кальмары, креветки, грибы, перепела, томатный соус, кальмары и мидии по вкусу и по вкусу

PAELLA DE MARISCO

ARROZ A BANDA
arroz, calamar, gambas, setas, tortido y perdizo

ARROZ A BANDA
à la calmar, crevettes, champignons, tortisses, perdrix, sauce à la sauce

RIS A BANDA
Riz, Tintenfisch, Garnelen, Champignons, Tortisens, Wildgans, Sauce à la Sauce

Рис а-бандэ
рис, кальмары, креветки, грибы, перепела, томатный соус, кальмары и мидии по вкусу и по вкусу

ARROZ A BANDA

FIDEUÀ
arroz, calamar, gambas, setas, tortido y perdizo

FIDEUÀ AUX FRUITS DE MER
à la seiche, calamars, crevettes, champignons, tortisses, perdrix, sauce à la sauce

FIDEUÀ MIT MEERESFRUCHTEN
Riz, Tintenfisch, Garnelen, Champignons, Tortisens, Wildgans, Sauce à la Sauce

FIDEUÀ
рис, кальмары, креветки, грибы, перепела, томатный соус, кальмары и мидии по вкусу и по вкусу

FIDEUÀ

ARROZ AL HORNO
arroz, calamar, gambas, setas, tortido y perdizo

RIZ AU FOUR
à la seiche, calamars, crevettes, champignons, tortisses, perdrix, sauce à la sauce

GERÄUCHTES RIZ
Riz, Tintenfisch, Garnelen, Champignons, Tortisens, Wildgans, Sauce à la Sauce

Зитонский рис
рис, кальмары, креветки, грибы, перепела, томатный соус, кальмары и мидии по вкусу и по вкусу

ARROZ AL HORNO

Software product lines

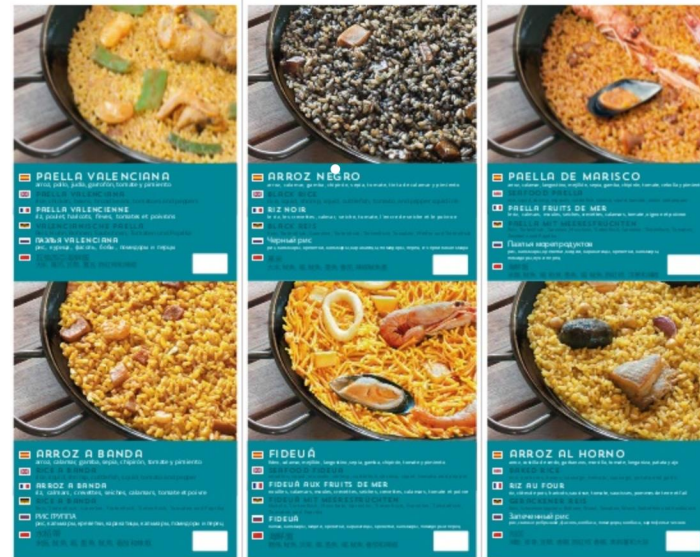

Mass production

producing efficiently a large amount of
standardized products

Software product lines

Software product lines

Mass customization

“a paradigm shift for the enterprise to offer products and services best catering to individual customer's needs whereas keeping near-mass production efficiency “

[Tseng, M.M., Jiao, J. (2001)]

Software product lines

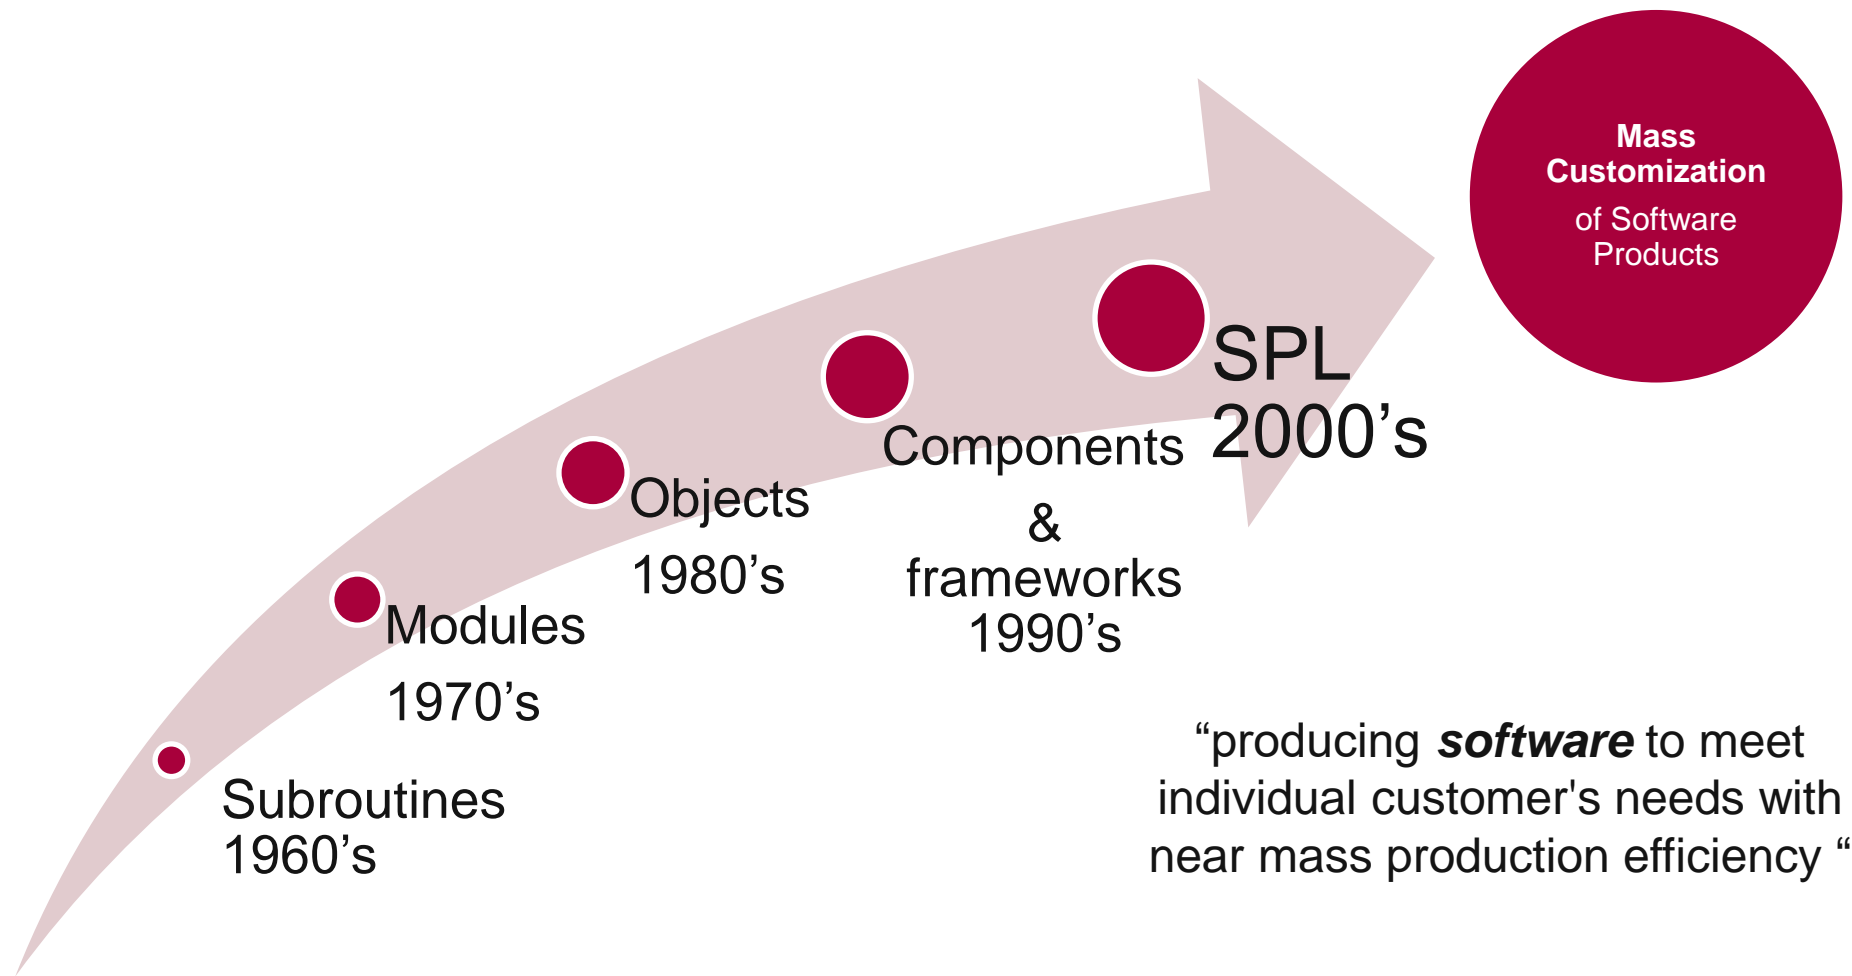

Mass customization

“a paradigm shift for the enterprise to offer products and services best catering to individual customer's needs whereas keeping near-mass production efficiency “

[Tseng, M.M., Jiao, J. (2001)]

Software product lines

Software product lines

Common features

Alarm clock

Calls

Messaging

Variable features

Media

Games

Connectivity

Variability Model

❖ Documents the variability of SPL

❖ Enable managing the variability

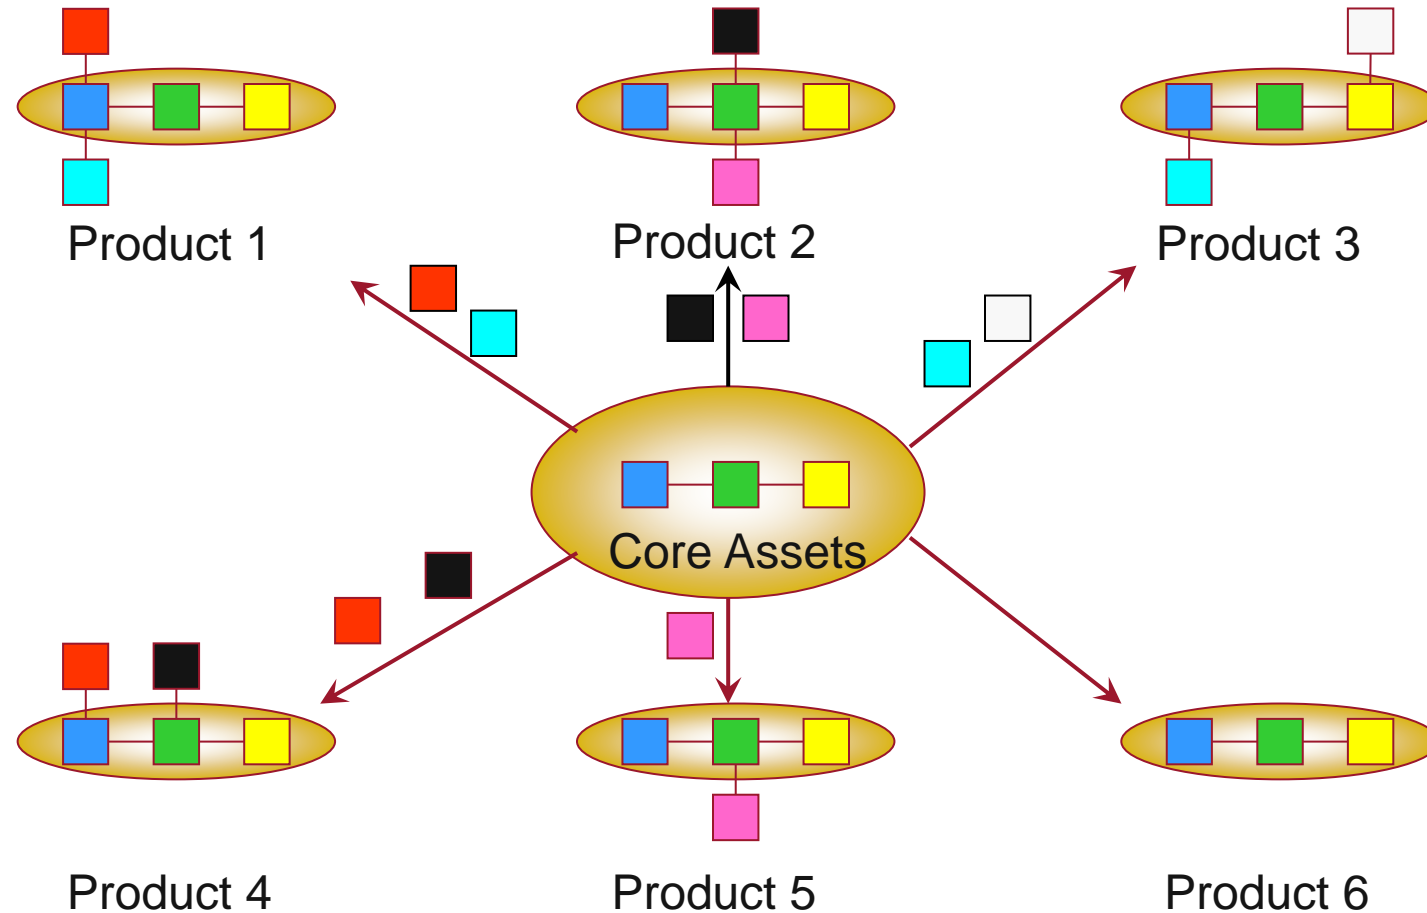

Software product lines

Traditional Approach (*mass production*)

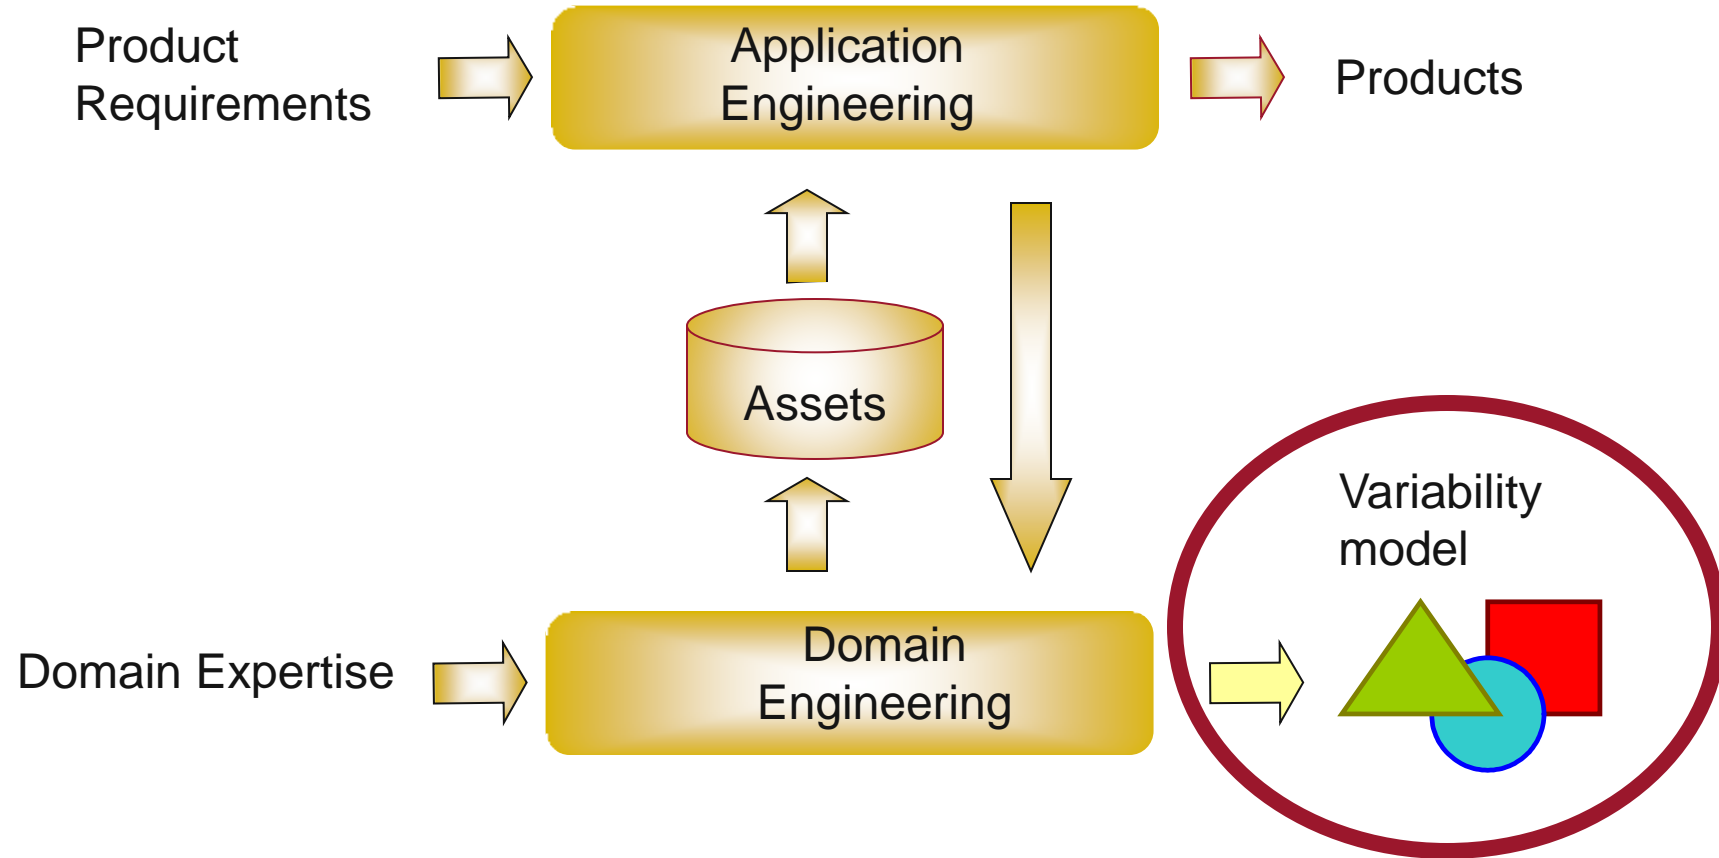

Software product lines

Product Lines Approach (*mass customization*)

SPL: Activities

SPL framework

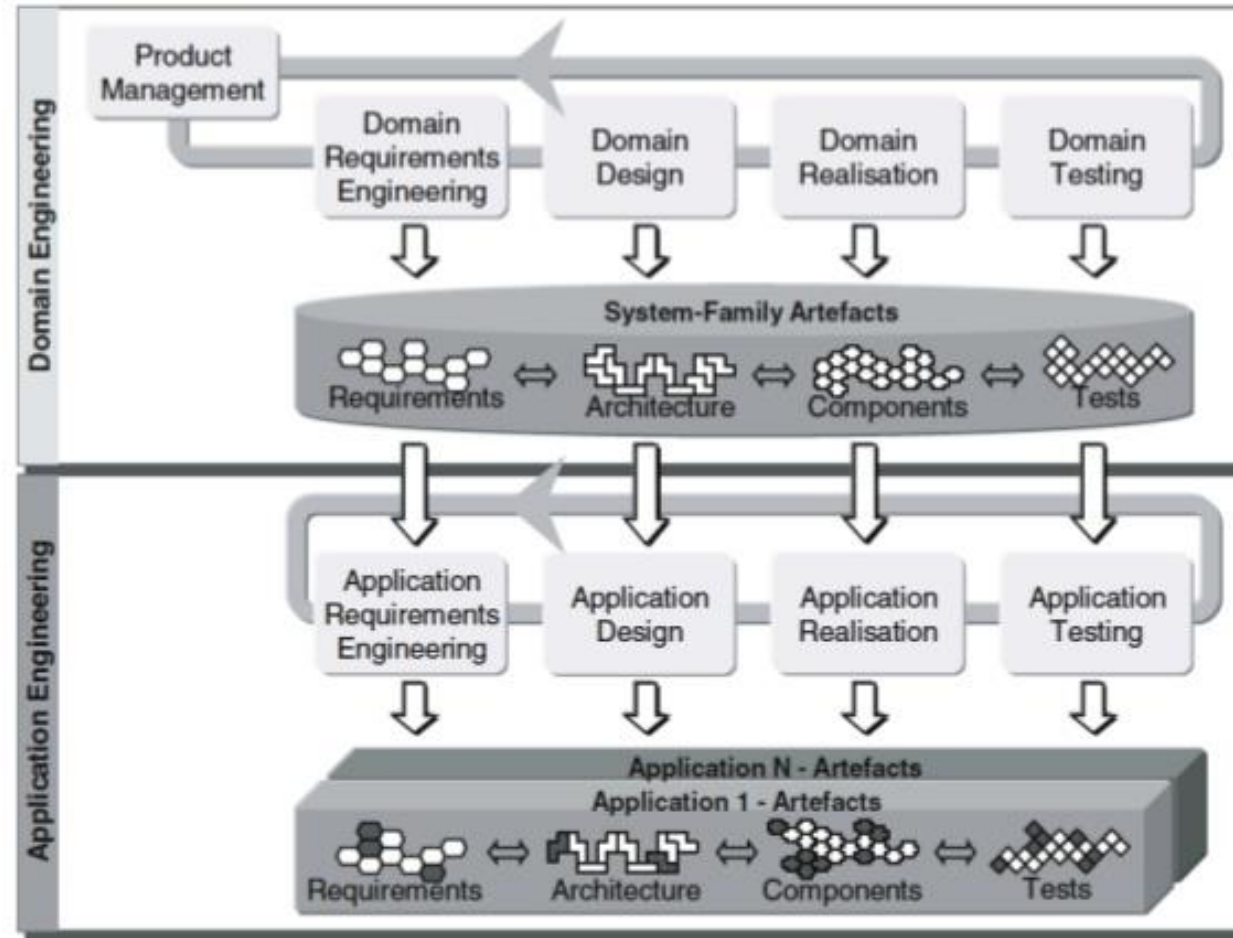

Fig. 1.2. The two-life-cycle model of software product line engineering

From "[Software Product Line Engineering](#)" by Phol et al.

A more practical view of the SPL framework

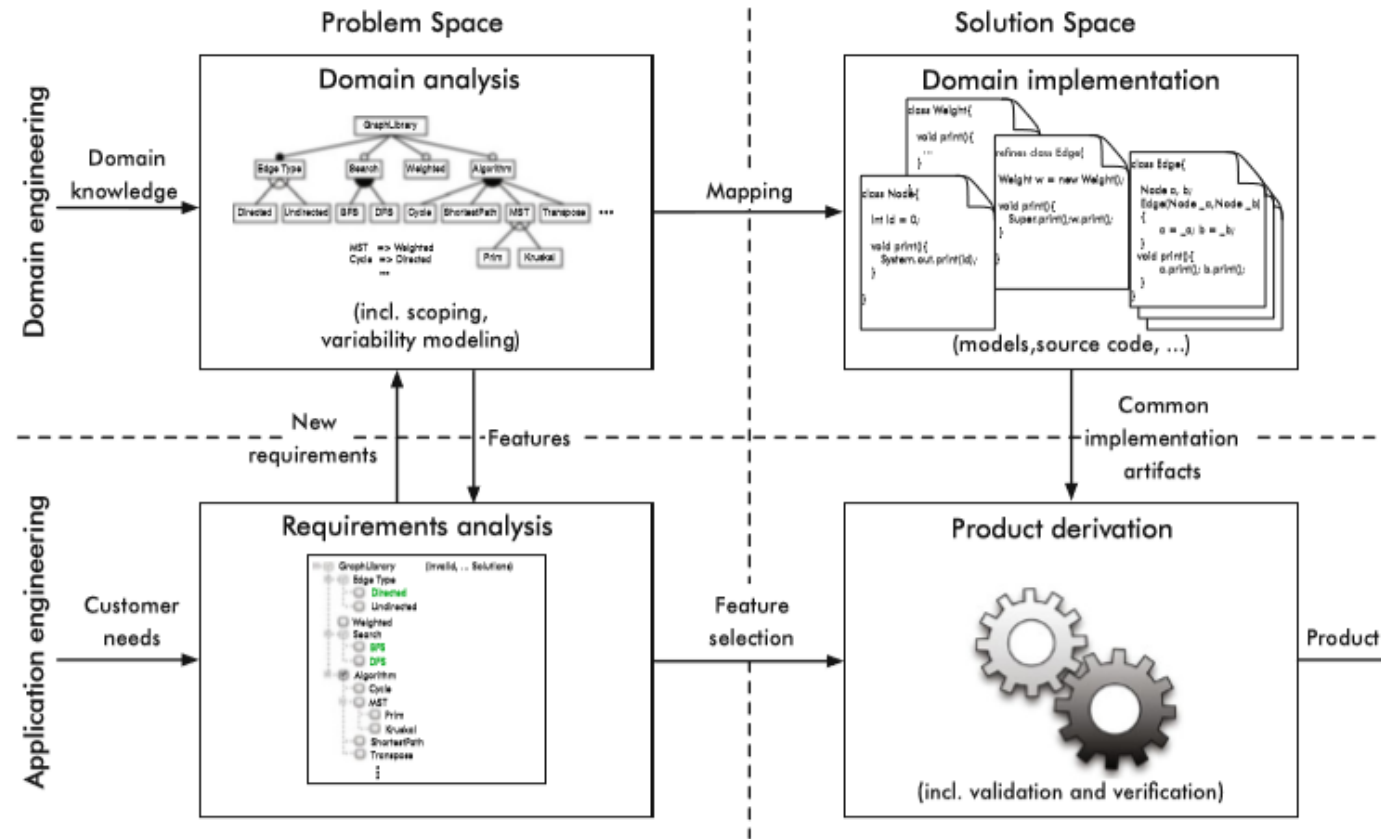

Fig. 1.1 An overview on software product-line engineering

From "Mastering Software Variability with FeatureIDE"

**What are the
reasons for
SPL
“tentations”?**

Product explosion

Customers explosion

Technology explosion

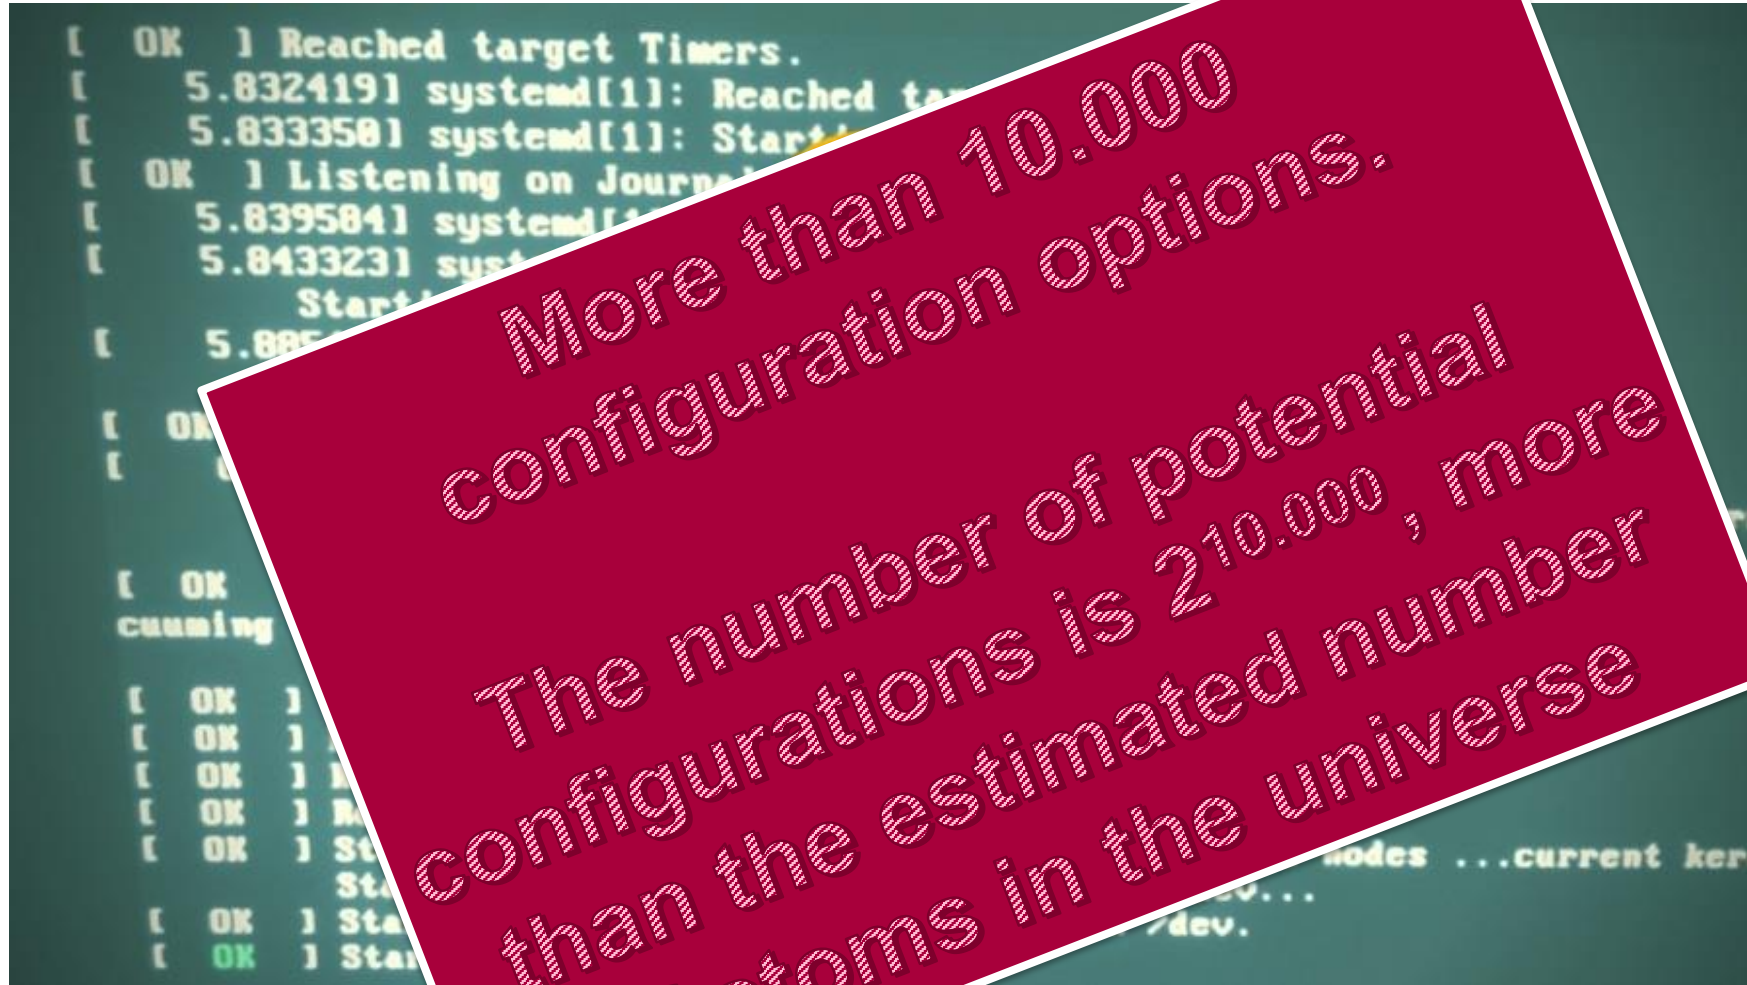

Configuration explosion

```
[ OK ] Reached target Timers.
[ 5.832419] systemd[1]: Reached target Timers.
[ 5.833350] systemd[1]: Starting Journal Socket.
[ OK ] Listening on Journal
[ 5.839584] systemd[1]: Listening on Journal Socket.
[ 5.843323] systemd[1]: Starting dracut cmdline hook...
Starting dracut cmdline hook...
[ 5.885472] systemd[1]: Starting Journal Service...
Starting Journal Service...
[ OK ] Started Journal Service.
[ 6.007239] systemd[1]: Starting Create static device nodes...current kernel
Starting Setup Virtual Console.
[ OK ] Listening on udev kernel socket.
[ 6.559659] systemd-journald[50]:
cuming done, freed 0 bytes.

[ OK ] Listening on
[ OK ] Reached target
[ OK ] Reached target
[ OK ] Reached target
[ OK ] Started Create list of required static device nodes ...current kernel
Starting Create static device nodes in /dev...
[ OK ] Started Create static device nodes in /dev.
[ OK ] Started Setup Virtual Console.
```

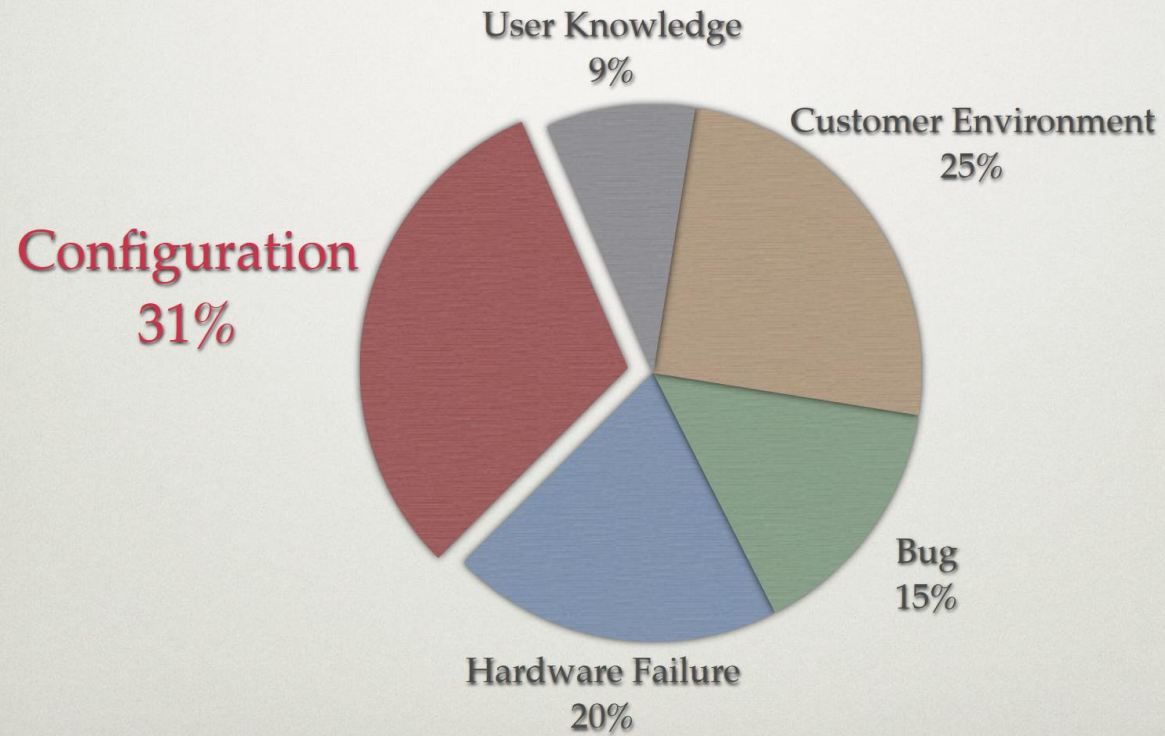

Configuration explosion

Configuration explosion

ROOT CAUSES OF CUSTOMER REPORTED ISSUES

Explosions consequences

- Product oriented development
- Fire-fighting mode
- Opportunistic reuse

- Lack of innovation
- Quality degradation
- Knowledge lost

Some “temptations”

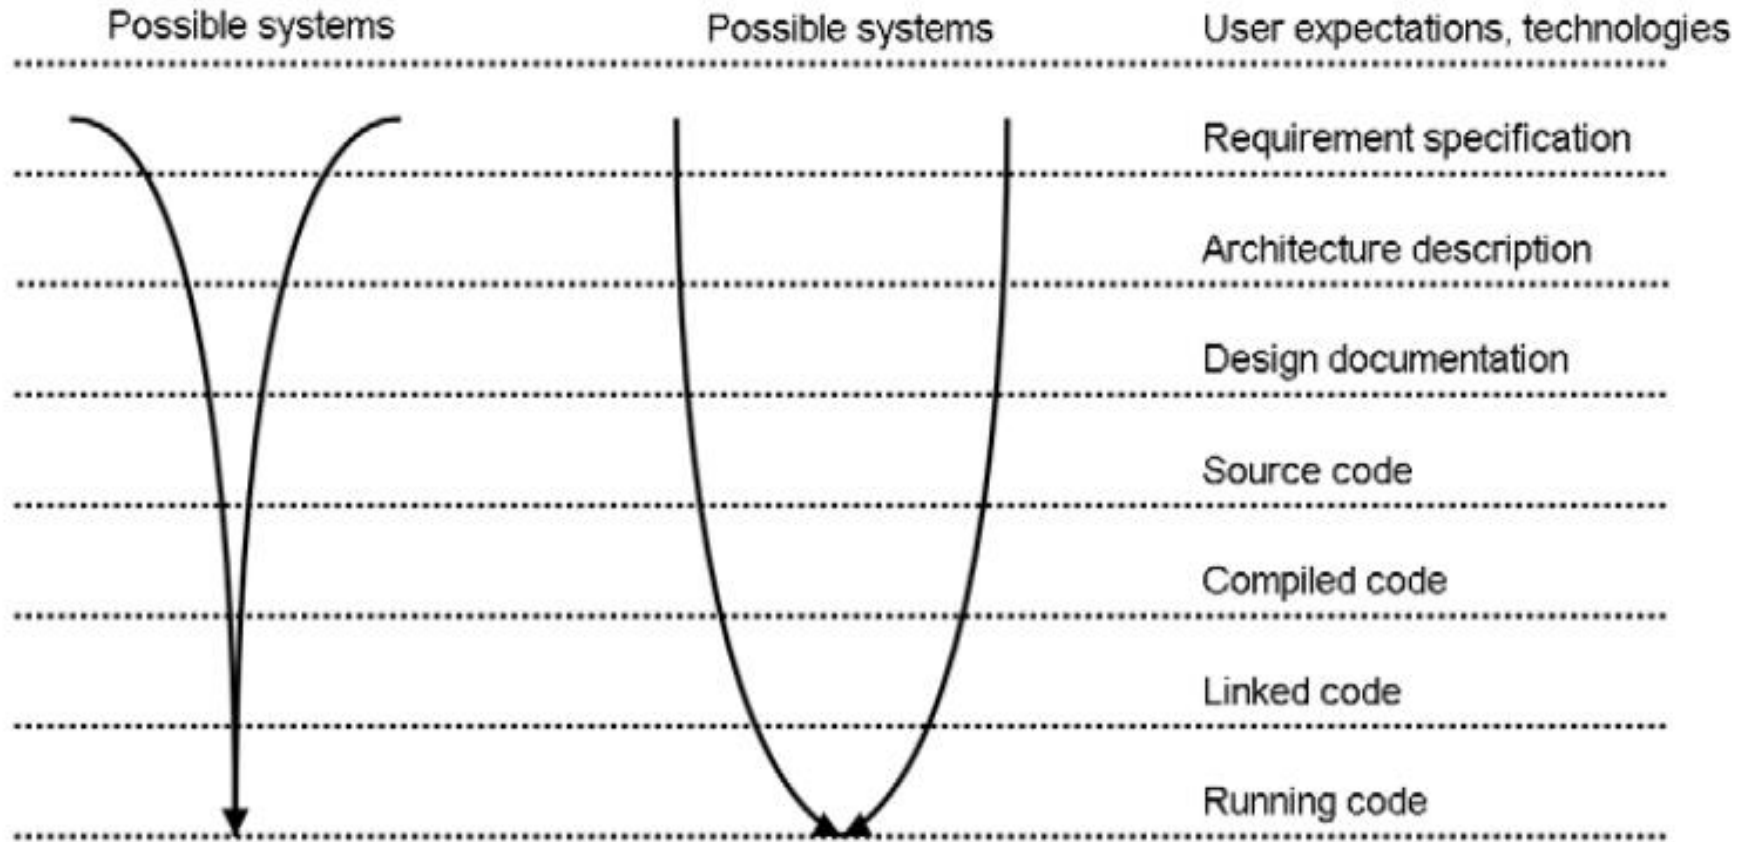

Product portfolio diversity

Common user experience for product in the portfolio

Customization of products

**What are the
goals?**

SPL metaphors

Svahnberg M., van Gurp J., Bosch J., *On the Notion of Variability in Software Product Lines*. Proceedings of IEEE/IFIP Conference on Software Architectures, 2001.

SPL metaphors

Figure 1.1: SPL maturity stages: from less mature (left) to more mature (right)[DSB05]).

Evolution of an SPL

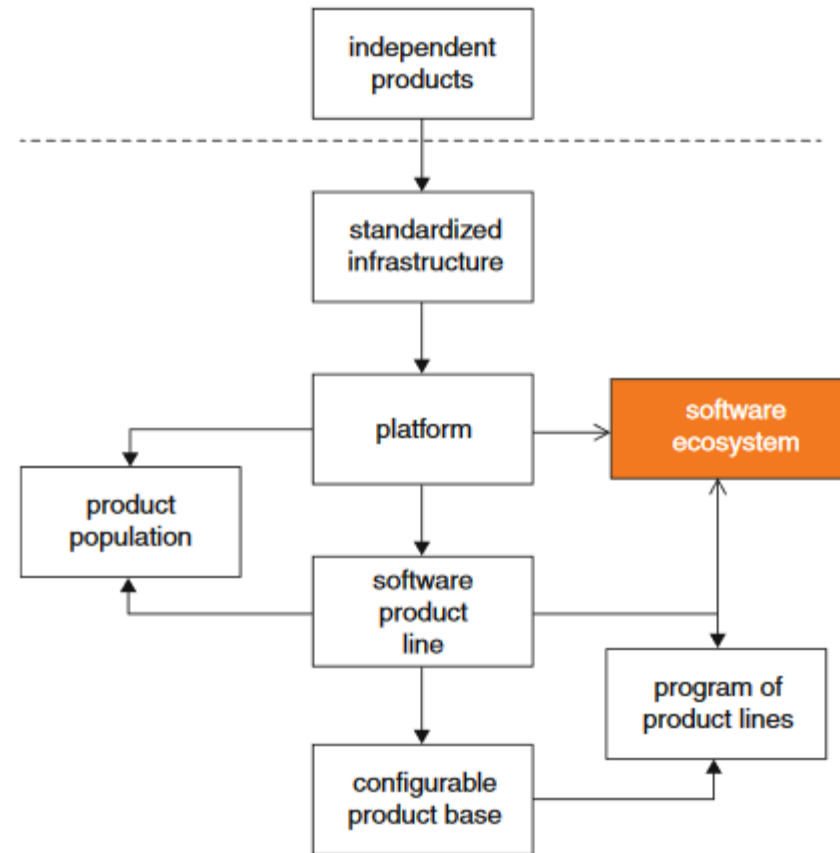

Fig. 1.1 Evolution of a software product line

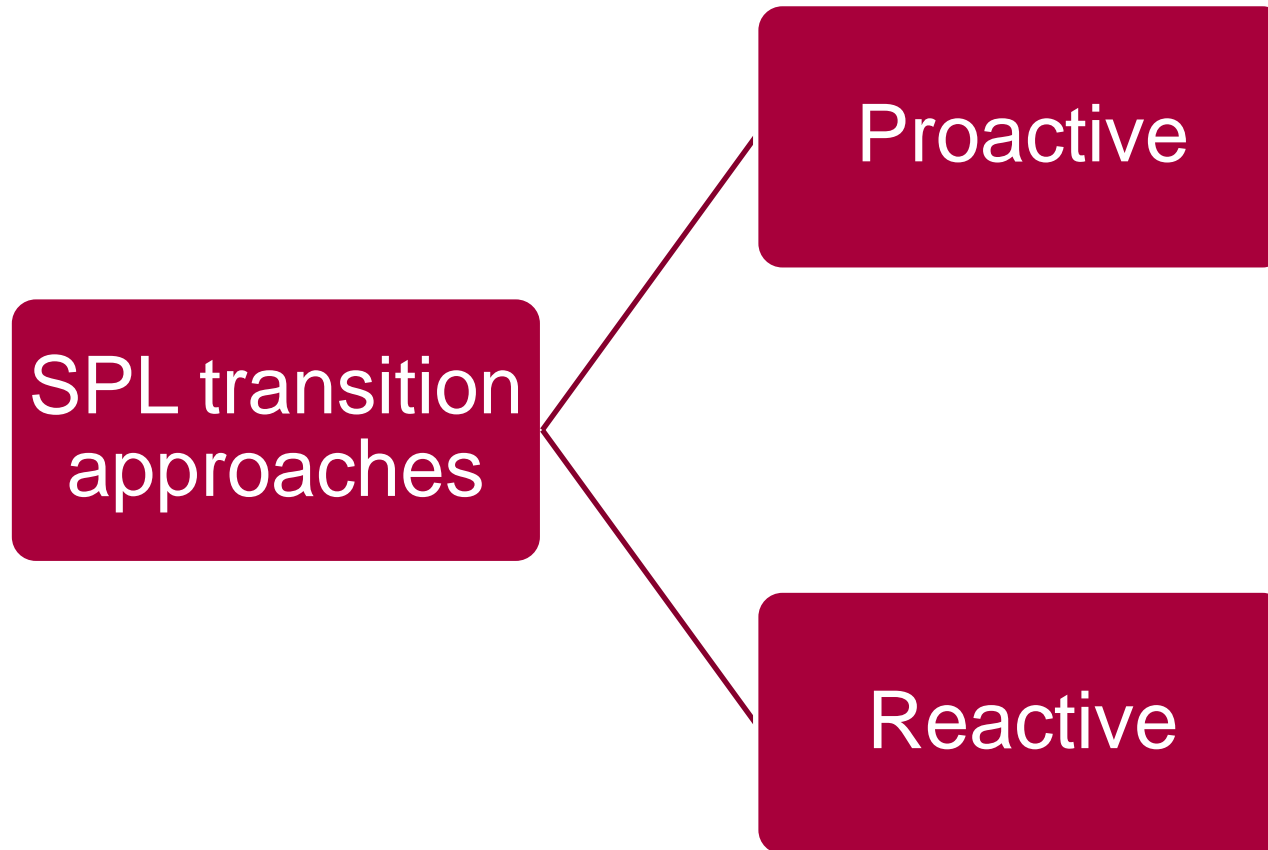

Taken from “Systems and Software Variability Management”

OK, I trust you

but...

how shall I

transition?

Some barriers

Business strategy

Variability, a new degree of complexity

DISCUSSION QUESTIONS

Software Product Lines

Variability modelling

How to model
variability?

How to model variability

Inside the model

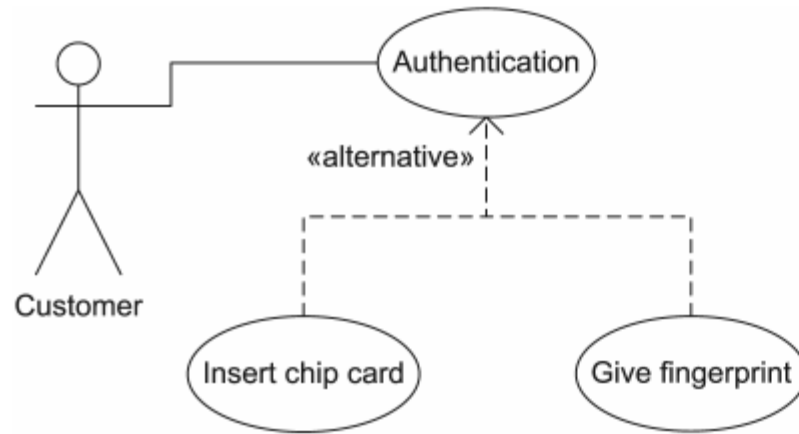

Figure 5: Example of an alternative relationship

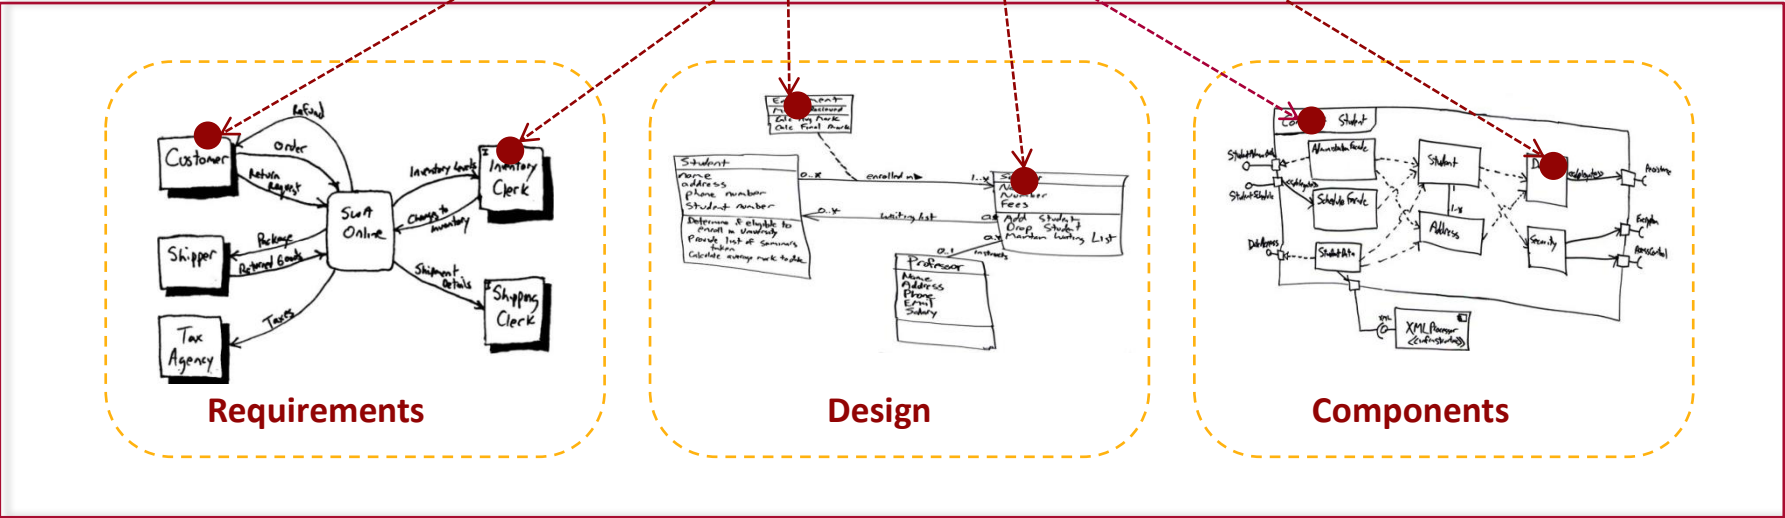

Figure 6: Example of an optional relationship

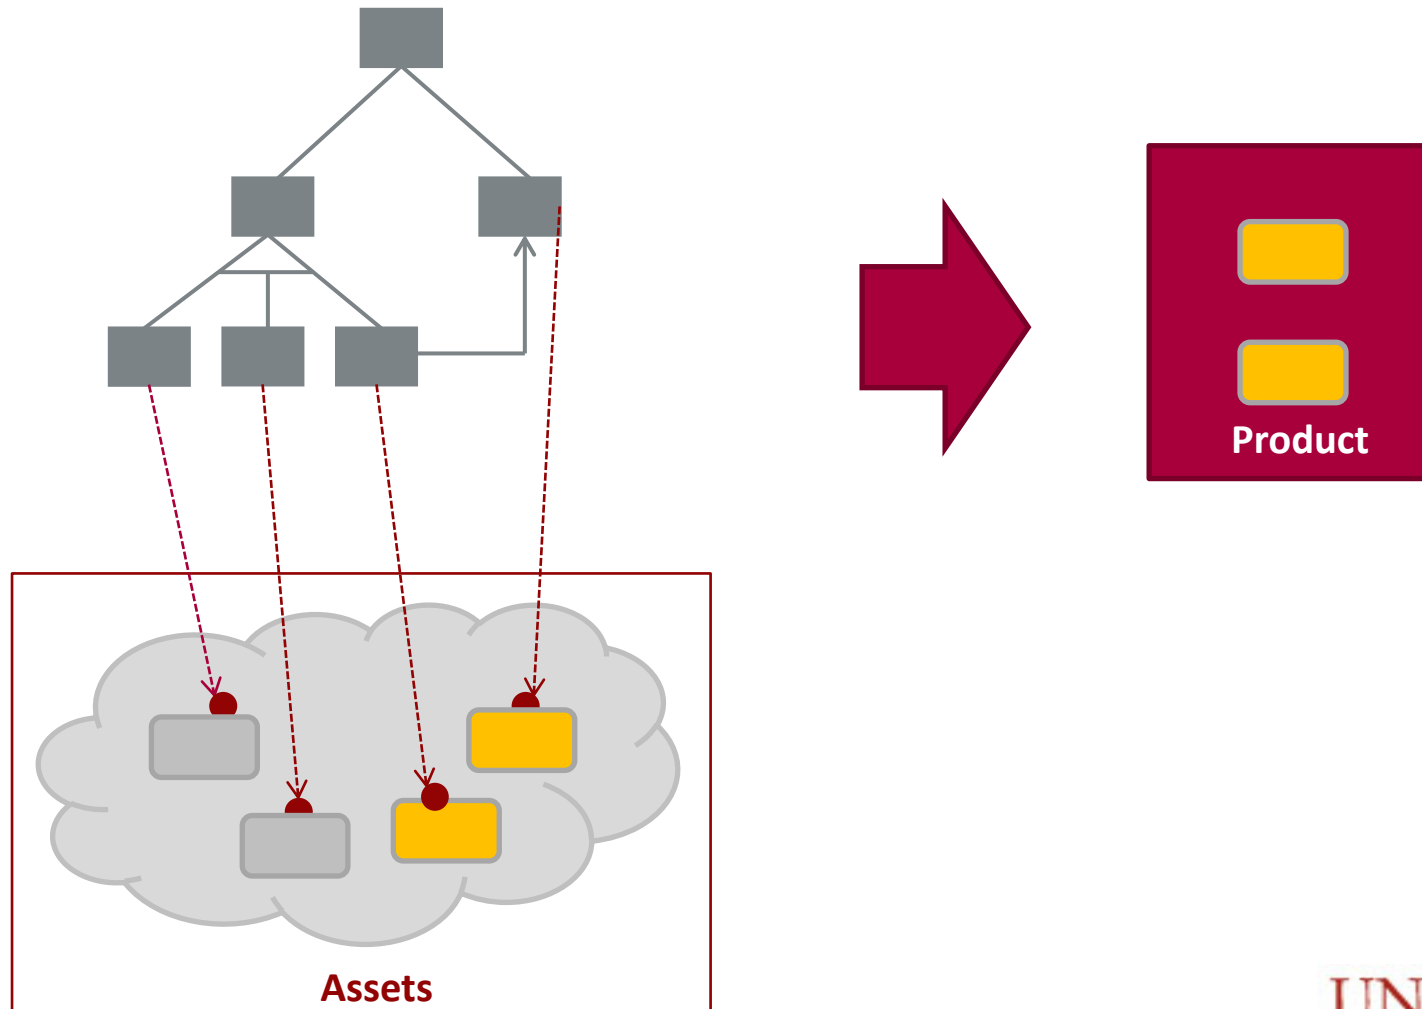

Outside the model

Variability Model

Base models

Positive
variability

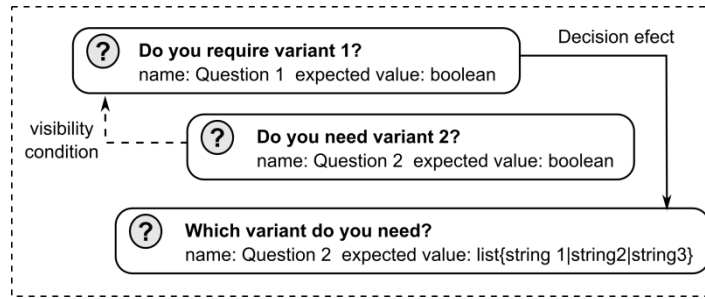

Negative variability

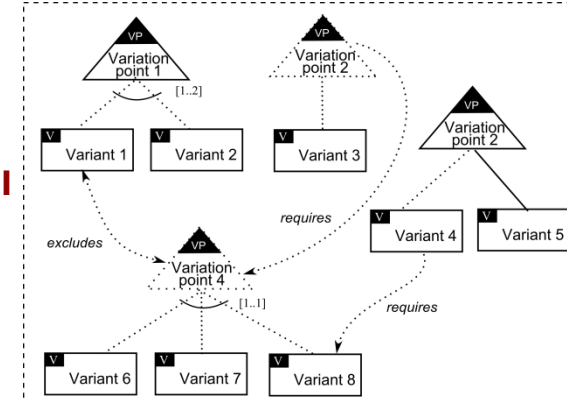

How to model variability

Feature modelling

Decision modelling

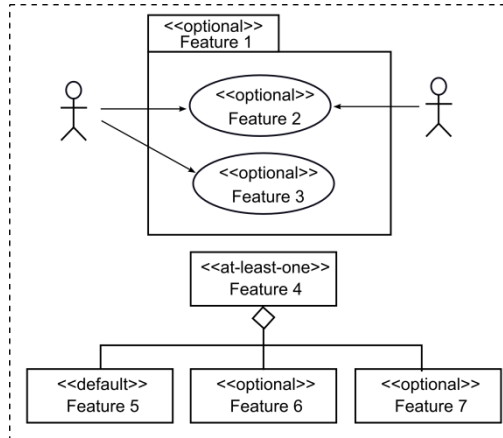

Orthogonal variability modelling

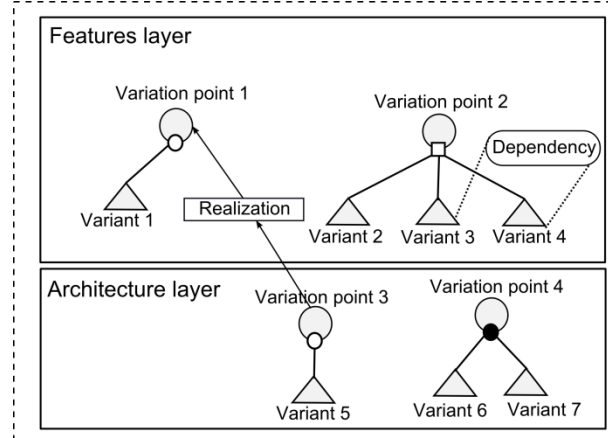

Ad-hoc solutions:
tables, textual
docs, ...

UML-based

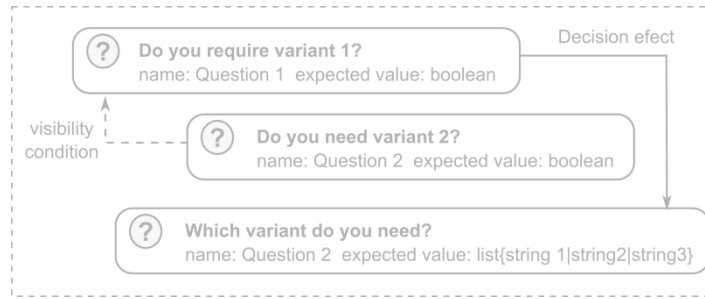

COVAMOF

How to model variability

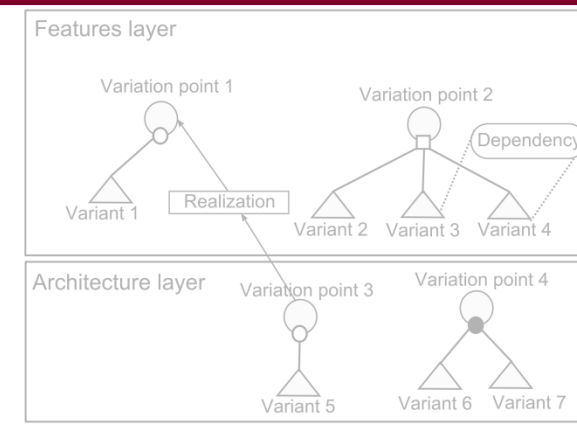

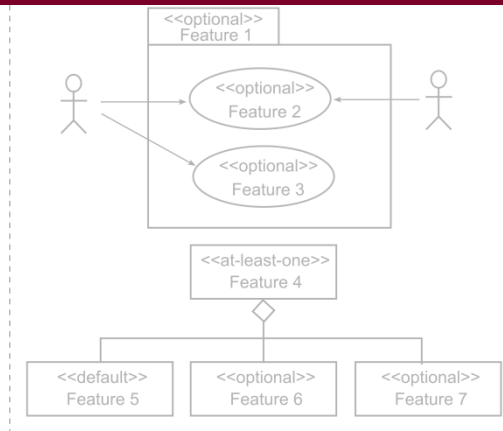

Feature modelling

Decision modelling

Feature models were first introduced by Kang et al. in 1990

Ad-hoc tables,
...

Feature models

How to specify a particular product?

FEATURE

“An important part of something”

“A prominent or distinctive characteristic of a software system”

Feature models

How to specify an SPL?

“Feature Model: A hierarchically arranged set of features to represent all possible products of an SPL”

Design a feature model for your
own SPL!

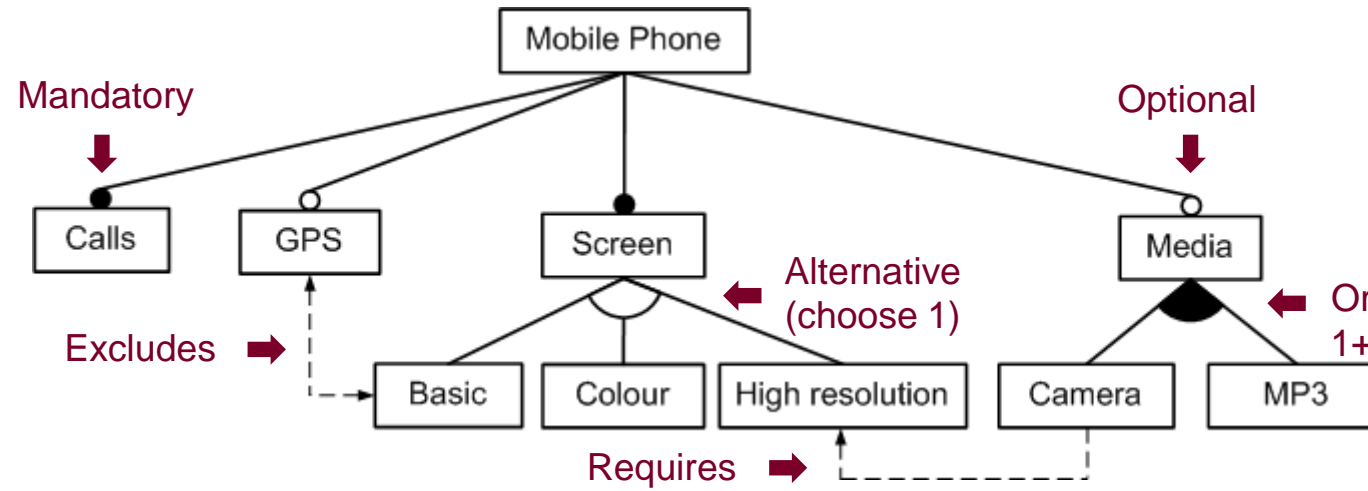

Feature models

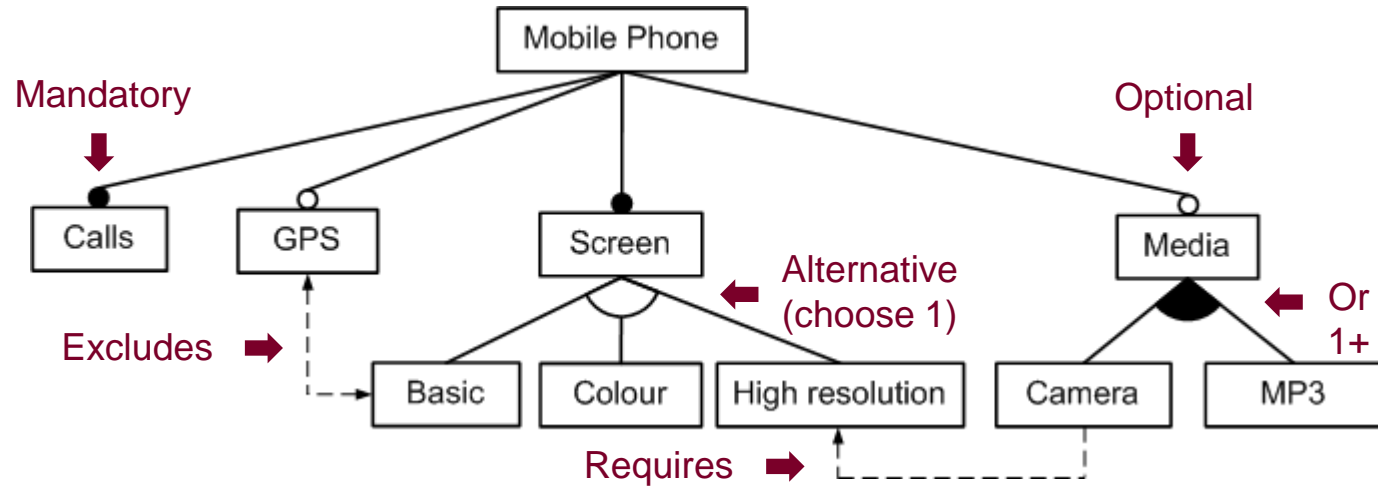

Feature models

Feature models

Feature models

- **Mandatory:** $A \rightarrow B \ \&\& \ B \rightarrow A$
- **Optional:** $B \rightarrow A$
- **Alternative:** $\text{sum}(B_i) = 1 \ \&\& \ B_i \rightarrow A$
- **Or:** $\text{sum}(B_i) > 1 \ \&\& \ (B_i) \leq \text{count}(B)$
- **Requires:** $A \rightarrow B$
- **Excludes:** $A \rightarrow !B \ \&\& \ B \rightarrow !A$

Automated analysis of feature models: Computer-aided extraction of information from FMs

How many products?

14

Automated analysis of feature models: Computer-aided extraction of information from FMs

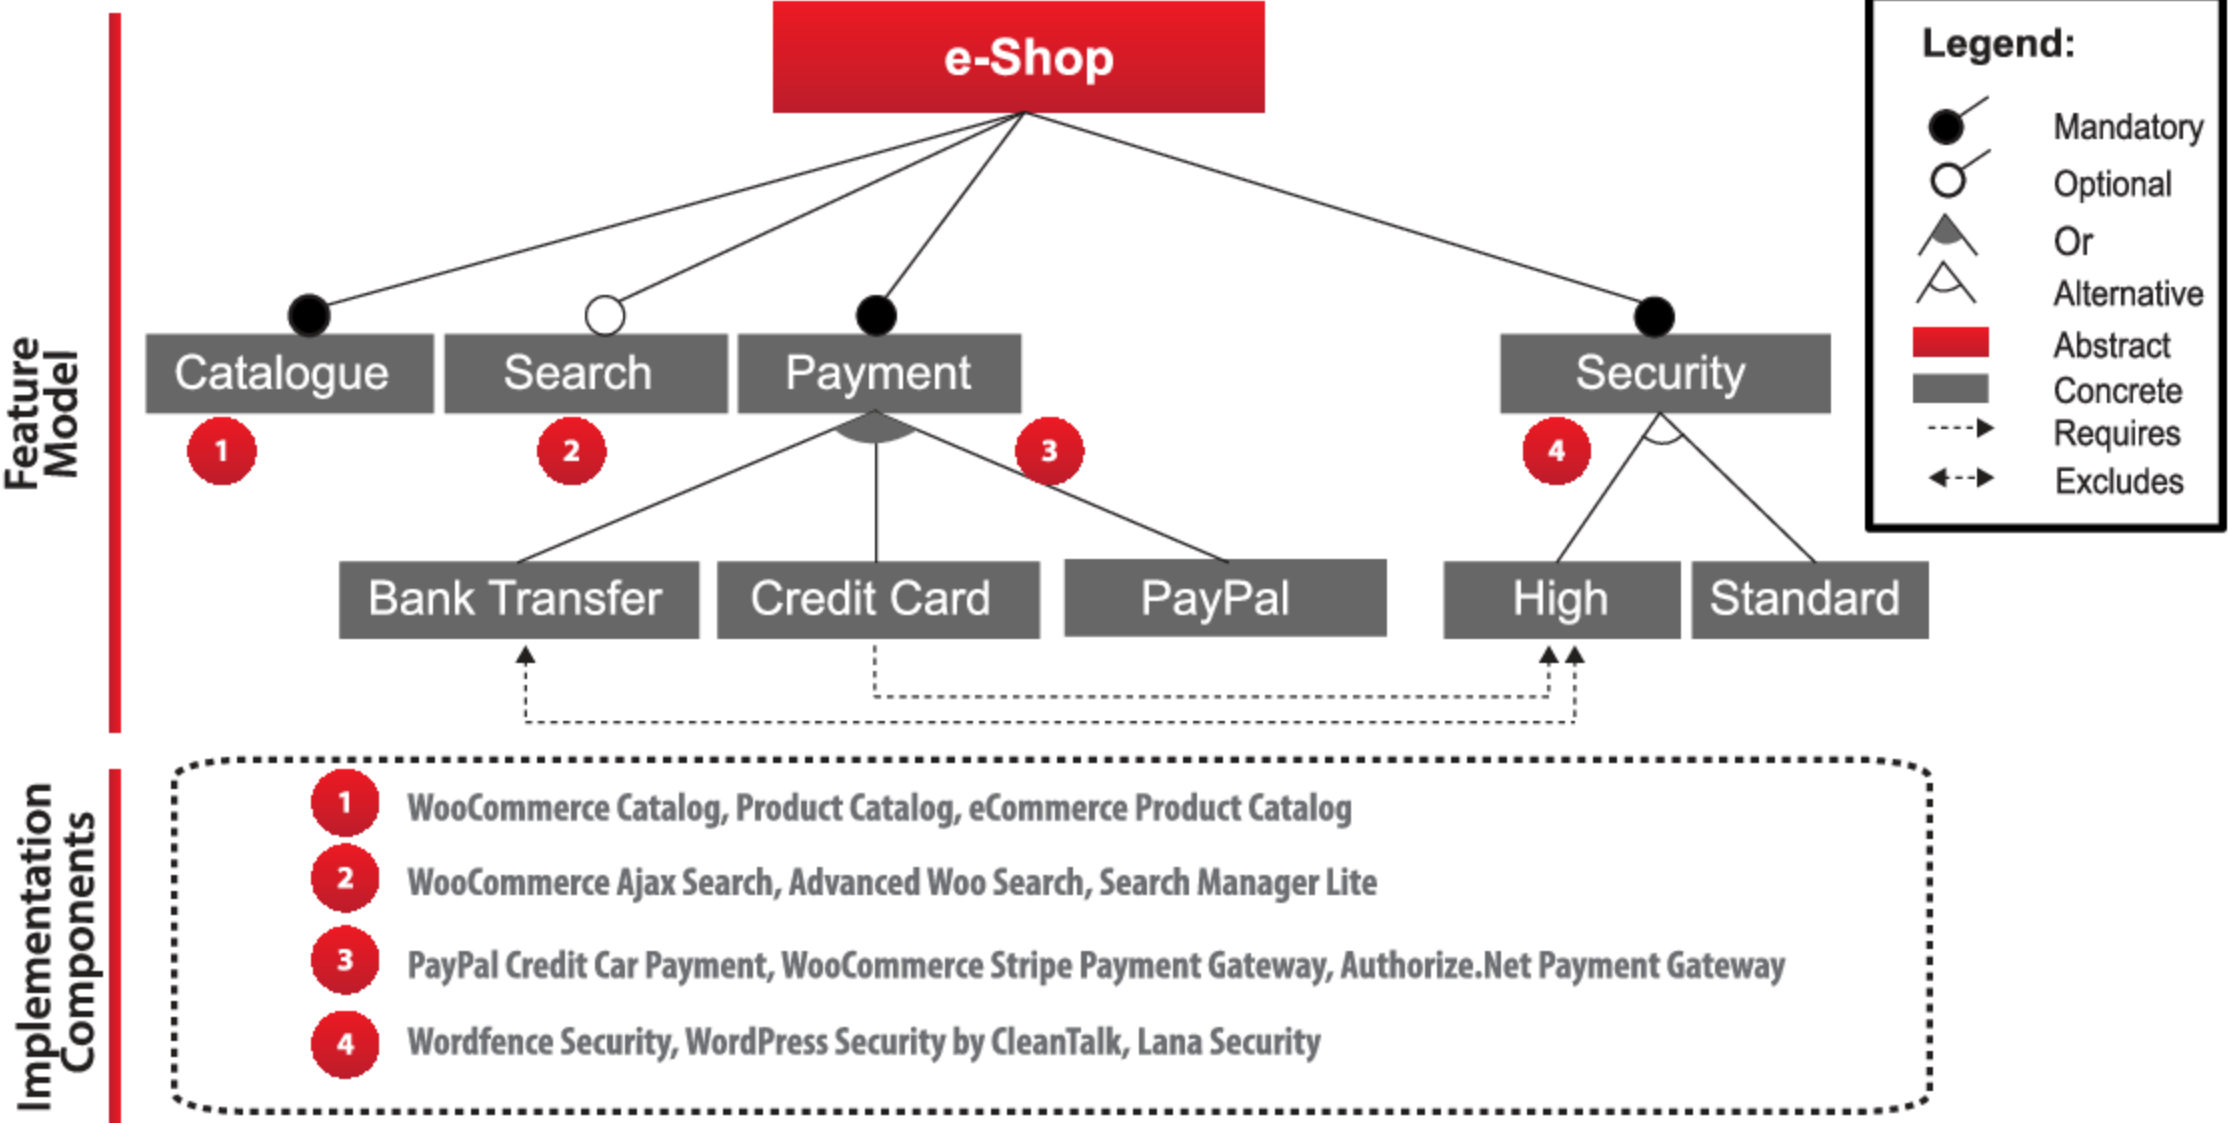

Any error?

Yes, feature
"Basic" is dead

Other problems!

Virtual Separation of Concerns – A Second Chance for Preprocessors
